FORCE10 NETWORKS HOSTS DATA CENTER VIRTUALIZATION WEBINAR

SAN JOSE, Calif., October 27, 2008 – Force10 Networks®, the pioneer in building and securing reliable networks, will discuss trends in data center virtualization during a Webinar, scheduled for Wednesday, October 29 at 11 a.m. PDT.

Data center virtualization offers an opportunity for companies to evolve their networks into strategic business assets, based on the use of scalable, high density, high availability technology solutions. The session, lead by Force10 Vice President of Marketing Stephen Garrison and co-hosted by IDC Guest Speaker Cindy Borovick, will provide an overview on trends in data center virtualization, as well as offer guidance into virtualized data centers based on proven concepts, technologies and solutions that have been implemented into best-case network scenarios.

Webinar attendees can look forward to obtaining first-hand knowledge of the trends and challenges associated with virtualization, while gaining insight into how virtualization can be a key driver of network optimization. Participants will also benefit from a thorough examination of the roadblocks to virtualization, along with an overview of recommended solutions designed to resolve common challenges.

To register for the Force10 “Trends in Data Center Virtualization” Webinar, simply visit:

The Force10 Reliable Networking product portfolio supports advances in reliability, network control and scalability that enable customers to lower their total cost of ownership. By building a

flexible network that is ready to support emerging and evolving applications, organizations can optimize their networks for current needs as well as future requirements.

About Force10 Networks

Force10 Networks is the pioneer in building and securing reliable, high performance networks. With its no-compromise approach to networking and advances in high density Gigabit and 10 Gigabit Ethernet switching, routing and security, Force10 delivers the innovative technologies that allow customers to transform their networks into strategic assets at the lowest total cost of ownership.
